| Contains: | DIPHENY | /LMETHANEDIISOCYANATE, ISOMI | IERS AND H | OMOLOGUES | | |
| Persons already sensitised to diisocyanates may develop allergic reactions when using this product. Persons suffering from asthma, eczema or skin problems should avoid contact, including dermal contact, with this product. This product should not be used under conditions of poor ventilation unless a protective mask with an appropriate gas filter (i.e. type A1 according to standard EN 14387) is used. As of August 24, 2023, adequate training is required before industrial or professional use. | | | | | | |
| 2.3. Other hazards | | | | | | |
| On the basis of available da | ata, the proc | duct does not contain any PBT or vPv | vB in percent | age ≥ than 0,1%. | | |
| The product does not conta | ain substand | ces with endocrine disrupting propertie | ies in concen | tration \geq 0.1%. | | |

Revision nr. 2

Dated 23/03/2023 Printed on 15/05/2023

Page n. 4/17

Replaced revision:1 (Printed on: 23/10/2020)

CAS 78-40-0

REACH Reg. 01-2119492852-28

The full wording of hazard (H) phrases is given in section 16 of the sheet.

The product is an aerosol containing propellants. For the purposes of calculation of the health hazards, propellants are not considered (unless they have health hazards). The percentages indicated are inclusive of the propellants.

Percentage of propellants: 19,60 %

SECTION 4. First aid measures

4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

4.3. Indication of any immediate medical attention and special treatment needed

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE If overheated, aerosol cans can deform, explode and be propelled considerable distances. Put a protective helmet on before approaching the fire. Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

Revision nr. 2

Dated 23/03/2023 Printed on 15/05/2023

Page n. 5/17

Replaced revision:1 (Printed on: 23/10/2020)

6.1. Personal precautions, protective equipment and emergency procedures

Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site. Send away individuals who are not suitably equipped. Wear protective gloves / protective clothing / eye protection / face protection.

6.2. Environmental precautions

Do not disperse in the environment.

6.3. Methods and material for containment and cleaning up

Use inert absorbent material to soak up leaked product. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Avoid bunching of electrostatic charges. Do not spray on flames or incandescent bodies. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Do not eat, drink or smoke during use. Do not breathe spray.

7.2. Conditions for safe storage, including any incompatibilities

Store in a place where adequate ventilation is ensured, away from direct sunlight at a temperature below 50°C / 122°F, away from any combustion sources.

Storage class TRGS 510 (Germany): 2B

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

Legend:

(C) = CEILING ; INHAL = Inhalable Fraction ; RESP = Respirable Fraction ; THORA = Thoracic Fraction.

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

Exposure levels must be kept as low as possible to avoid significant build-up in the organism. Manage personal protective equipment so as to guarantee maximum protection (e.g. reduction in replacement times).

POLIPUR EI

Revision nr. 2

Dated 23/03/2023 Printed on 15/05/2023

Page n. 8/17

Replaced revision:1 (Printed on: 23/10/2020)

HAND PROTECTION Chemical resistant gloves category III. Choose the thickness so that the permeation time is longer than the time of re-use of the product.

SKIN PROTECTION

Protective clothing category III. Antistatic safety shoes and chemical-resistant category III.

EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, a Half mask with filters for gases, vapors, and particulate category III (see standard EN 14387).

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

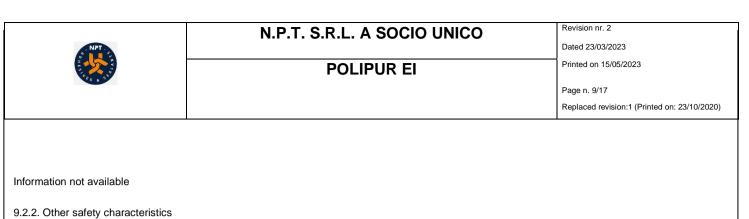

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

| Properties Appearance | Value aerosol | Information |
|--|----------------------------|--|
| Colour | red | |
| Odour | odourless | |
| Odour threshold | not applicable | |
| Melting point / freezing point | not applicable | |
| | -12 °C | Demorty (propellante (propellant) |
| Initial boiling point Flammability | flammable gas | Remark:(propellente/propellant) |
| Lower explosive limit | not available | |
| Upper explosive limit | not available | |
| Flash point | < -85 °C | Remark:propellente/propellant |
| Auto-ignition temperature | > 460 °C | |
| Decomposition temperature | not applicable | |
| рН | not applicable | Reason for missing data:substance/mixture reacts with water |
| Kinematic viscosity | not applicable | Reason for missing data:Determination is not technically possible. |
| Dynamic viscosity | not applicable | Reason for missing data:Determination is not technically possible. |
| Solubility | insoluble in water | |
| Partition coefficient: n-octanol/water | not applicable | |
| Vapour pressure Density and/or relative density | 300 kPa ca. 1,05 kg/dm3 | Temperature: 50 °C |
| Relative vapour density | not available | |
| Particle characteristics | not applicable | |
| | | |

9.2. Other information

9.2.1. Information with regard to physical hazard classes

VOC (Directive 2010/75/EU) Oxidising properties 18,10 % - 199,10 g/litre not applicable

SECTION 10. Stability and reactivity

10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

10.2. Chemical stability

The product is stable in normal conditions of use and storage.

Reaction products of phosphoryl trichloride and 2-methyloxirane - Above 150 ° C it decomposes.

10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

10.4. Conditions to avoid

Avoid overheating.

10.5. Incompatible materials

Strong reducing or oxidising agents, strong acids or alkalis, hot material.

10.6. Hazardous decomposition products

Reaction products of phosphoryl trichloride and 2-methyloxirane - HCL, phosphorus oxides and chlorinated hydrocarbons.

SECTION 11. Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism, toxicokinetics, mechanism of action and other information

POLIPUR EI

Revision nr. 2

Dated 23/03/2023 Printed on 15/05/2023

Page n. 12/17

Replaced revision:1 (Printed on: 23/10/2020)

STOT - SINGLE EXPOSURE

May cause respiratory irritation

STOT - REPEATED EXPOSURE

May cause damage to organs

ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

SECTION 12. Ecological information

12.1. Toxicity

| and 2-methyloxirane | |
|-----------------------------------|---|
| LC50 - for Fish | 100 mg/l/96h Danio rerio |
| EC50 - for Crustacea | 131 mg/l/48h Daphnia magna |
| EC50 - for Algae / Aquatic Plants | 82 mg/l/72h Pseudokirchneriella subcapitata |

12.2. Persistence and degradability

Departies products of phoephory distribution

The paraffinic hydrocarbons fraction may be considered biodegradable in water and in air. They distribute mostly in the air. The small non biodegradable amount which spreads into water tends to accumulate in fish.

12.3. Bioaccumulative potential

| Isobutane | |
|---|---------------------|
| Partition coefficient: n-octanol/water | 2,76 |
| BCF | 27 |
| Reaction products of phosphoryl trichloride and 2-methyloxirane Partition coefficient: n-octanol/water BCF | 3,17 Log Kow 8 - |
| PROPANE | |
| Partition coefficient: n-octanol/water | 2,86 |
| BCF | 13 |
| | |

| 2.4. Mobility in soil | | | |
| imethylether Surface tension = 1,136E-2 N/m (25 ºC) | | | |
| obutane /olatility (Henry) = 1,206E + 5 Pa·m³/mol; | Surface tension = 9,84E-3 N/m (25 °C) | | |
| ROPANE √olatility (Henry) = 7,164E + 4 Pa⋅m³/mol; | Surface tension = 7,02E-3 N/m (25 °C) | | |
| riethylphosphate Surface tension 0,029610 N/m (25 ºC) Isobutane | | | |
| Partition coefficient: soil/water | 35 | | |
| Reaction products of phosphoryl trichloride | e | | |
| Partition coefficient: soil/water | 324,2 Koc | | |
| PROPANE | | | |

12.5. Results of PBT and vPvB assessment

Partition coefficient: soil/water

On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.

12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

460

12.7. Other adverse effects

Information not available

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions. CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

The correct disposal code (determined by the waste generation method) cannot be specified by the manufacturer in the case of products used in various sectors.

EWC code (recommended): 16 05 04.

REGULATION (EU) N. 1357/2014 :HP3 Flammable, HP4 Irritant, HP5 Specific target organ toxicity (STOT)/Aspiration toxicity, HP6 Acute toxicity, HP13 Sensitizing, HP7 Carcinogenic

Replaced revision:1 (Printed on: 23/10/2020)

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

| Flam. Gas 1A | Flammable gas, category 1A |
|---------------|--|
| Aerosol 1 | Aerosol, category 1 |
| Aerosol 3 | Aerosol, category 3 |
| Press. Gas | Pressurised gas |
| Carc. 2 | Carcinogenicity, category 2 |
| Acute Tox. 4 | Acute toxicity, category 4 |
| STOT RE 2 | Specific target organ toxicity - repeated exposure, category 2 |
| Eye Irrit. 2 | Eye irritation, category 2 |
| Skin Irrit. 2 | Skin irritation, category 2 |
| STOT SE 3 | Specific target organ toxicity - single exposure, category 3 |
| Resp. Sens. 1 | Respiratory sensitization, category 1 |
| Skin Sens. 1 | Skin sensitization, category 1 |
| H220 | Extremely flammable gas. |
| H222 | Extremely flammable aerosol. |
| H229 | Pressurised container: may burst if heated. |
| H280 | Contains gas under pressure; may explode if heated. |
| H351 | Suspected of causing cancer. |
| H302 | Harmful if swallowed. |
| H332 | Harmful if inhaled. |
| H373 | May cause damage to organs through prolonged or repeated exposure. |
| H319 | Causes serious eye irritation. |
| H315 | Causes skin irritation. |
| H335 | May cause respiratory irritation. |
| H334 | May cause allergy or asthma symptoms or breathing difficulties if inhaled. |
| H317 | May cause an allergic skin reaction. |
| EUH204 | Contains isocyanates. May produce an allergic reaction. |

Users must verify the suitability and thoroughness of provided information according to each specific use of the product. This document must not be regarded as a guarantee on any specific product property. The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses. Provide appointed staff with adequate training on how to use chemical products. CALCULATION METHODS FOR CLASSIFICATION Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9. Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11. Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12. Changes to previous review: The following sections were modified: 01/02/03/08/09/10/11/12/15/16.
